## Conformance Technologies Inks Deal with Pivotal Payments

**RENO, Nev., July 11, 2017 -- (Business Wire)** -- [Conformance Technologies](#)<sup>®</sup>, a fast-growing provider of operating systems, education systems and expertise used in managing business compliance requirements, today announced that [Pivotal Payments](#), a leading provider of technology-driven global payment processing solutions, has selected a suite of the company's solutions to enhance business effectiveness and protection of its North American merchant portfolio. The agreement encompasses Conformance's [PCI ToolKit](#)<sup>®</sup>, [Cyber Attack Readiness ToolKit](#)<sup>™</sup>, [InConRadar](#)<sup>™</sup> and [Data Incident Management Program](#)<sup>®</sup> offerings.

"Conformance Technologies has assembled a solution set that will provide our clients with an immediate benefit," said Philip Fayer, president and chief executive officer of Pivotal Payments. "Along with receiving new and innovative risk and compliance solutions in the language of their choice, business owners can expect a feature set that is second to none. We also look forward to greatly improving our business operations and profitability related to risk, underwriting and PCI compliance."

"We've worked hard to develop affordable, easy-to-use solutions that give small and midsize businesses (SMBs) sophisticated tools and resources to help them gain a leg up on cybercrime," said Darrel Anderson, president of Conformance Technologies. "We appreciate Pivotal Payments' validation of our approach, and are excited to deliver these solutions to their merchant customer base," added Anderson.

All Conformance Technologies' offerings run on the patent-pending Conformance Compliance Operating System<sup>™</sup> which facilitates rapid customer deployments and enhancements. PCI ToolKit, a [patented](#), multi-language capable, cost-effective solution, tackles the complexity of Payment Card Industry Data Security Standard [PCI DSS](#) compliance validation head-on for both SMBs and their payment processors. Simulating real-world attacks against merchant computer systems, the Cyber Attack Readiness ToolKit for penetration testing and primary account number (PAN) scanning, identifies SMB system vulnerabilities and risks for remediation as mandated by PCI DSS v3.2.

Receiving this year's Electronic Transactions Association's ([ETA](#)) [PayPal Tech Innovation Award](#) for best risk solution, InConRadar is a continuous merchant website and risk factor monitoring service that identifies suspicious commercial activities, plus potential image damaging circumstances and business practices requiring further payment processor investigation, both before and after onboarding. The Data Incident Management Program provides professional management and response to SMB data incidents, including forensics, equipment and software replacement, legal services, legal notifications, consumer notifications and public relations services.

To learn more about how products and services from Conformance Technologies can help you and your portfolio of merchant customers, please telephone 775.336.5533 or email [info@conformancetech.com](mailto:info@conformancetech.com).

### **About Conformance Technologies**

[Conformance Technologies](#) is a fast-growing provider of operating systems, educational systems and expertise used in managing business compliance requirements. More than 300,000 small and midsize business end-users rely on Conformance Technologies' solutions to protect their businesses every day, both domestically and in 19 countries around the world. Privately held and headquartered in Reno, Nevada, Conformance Technologies evolved from a payments consultancy and PCI compliance firm originally established in 2003. Today, the company has become a leading provider of automated compliance and sensitive data protection systems and services. InfoSecure Redteam, Inc. dba [InfoSecure Redteam Conformance](#) provides Payment Card Industry Security Standards Council (PCI SCC) Qualified Security Assessor ([QSA](#)) services.
